

# Think Pink!

We are proud of our granddaughter Britny Ann Sliker (10/26/05) in her Top Acres express wagon. We are also pleased with the progress of our joint project with GRI/Sexing Technologies. We and our customers have gained experience and confidence with the results obtained using sexed semen.

## Real results from Real People...

- We have had 67% conception rate. We have seen a similar difference in conception rate between cows and heifers that we see with conventional semen. We just got 25 more units last week and plan to use quite a bit of sexed semen this fall when the weather breaks. **Jeremy Daubert, victoryacresllc@yahoo.com**
- We used the first 5 units we got from you on 4 heifers and 1 cow. The heifers all conceived on first service - cow open. We're ready to start using the second shipment when the weather cools. **Dennis Smith 301/845-6894**
- We have used sexed semen for both A.I. single services and in our ET program. The first 7 heifers served resulted in 6 pregnancies on first service and 1 on the second service. We confirmed (6) female and (1) male pregnancies with fetus ultrasound. We now have ample results to list with our ET program. Heifer #339 made (6) fertile embryos - (5) pregnancies - (5) females. Heifer #380 made (6) fertile embryos - (3) pregnancies - (3) females. Heifer #344 made (5) fertile embryos. We froze (2), implanted (3) with (1) female pregnancy. **Mike Hellenbrand 608/798-1952**
- We bred 13 heifers with the sexed semen. All heifers were only serviced with (1) unit. Conception was 12 of 13 pregnant. Needless to say, we had an excellent herd check with 60 due March 2007. **Jeff Wolfe 717/752-5979**
- Although not advertised or endorsed for ET use, we have used the sexed semen on a trial basis within our flush program at Top Acres as well as single breedings and on IVF cows.  
Cow #002 - 10 eggs produced (7) viable, (4) frozen, (3) pregnancies, (3) females.  
Heifer #A1 - 11 eggs produced, (8) viable, (5) pregnancies, (5) females.  
Cow #1129 - 16 eggs, (6) viable, (6) frozen - Second Flush - 10 eggs, (2) viable, (2) frozen  
(8) heifers have been A.I. serviced with (5) pregnant on first service, (2) on second service, (1) still open.  
With partners, we have 24 IVF pregnancies with sexed semen - (22) females, (2) males.  
8/03/06 was ultrasound day at Top Acres. It was both unusual and encouraging to have Dr. Gardner say "It's a girl" 9 for 9. Nowadays we look forward to his visit to keep us tickled pink. **Wayne 937/477-6304**
- As reported to us thus far - 67 pregnancies have been verified by ultrasound - (62) females (5) males

### Sexed semen ET's coming from these All-Time Favorites

**Top Acres Pre Bouquet ET "2E94/95MS"**  
3x All American  
3 "VG89/90MS" 2 year old daughters
